

Hemp and Medicinal Cannabis

Testing for compliance

Expert testing services

ChemCentre offers testing of industrial hemp to ensure compliance with state and federal regulations in relation to the permitted tetrahydrocannabinol (THC) content.

It also offers testing of medicinal cannabis for compliance with Therapeutic Goods Order No. 93 (Standard for Medicinal Cannabis). This testing includes determination of an extensive cannabinoid profile as well as the analysis of terpenes, mycotoxins, heavy metals, pesticides and residual solvents.

The independent testing undertaken by ChemCentre will confirm compliance with relevant state and federal regulations, while also providing access to scientific consultancy services that can assist with queries regarding product development and formulation.

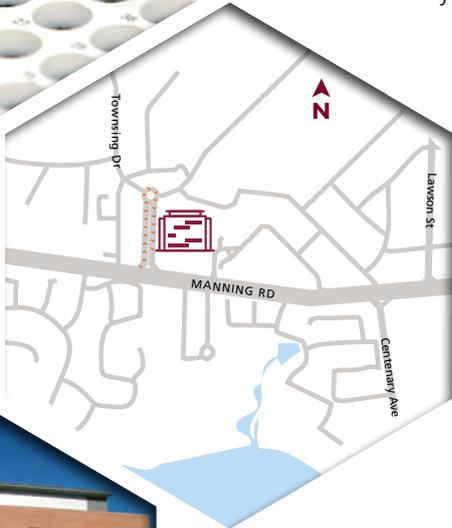

Why ChemCentre?

ChemCentre is ideally placed to offer testing services of medicinal cannabis and industrial hemp for use in the production of food and pharmaceuticals.

As a statutory authority of the Western Australian Government, ChemCentre is proud of its reputation as a leading provider of scientific expertise and analytical chemistry and forensic science services locally, nationally and globally.

For more than 130 years, ChemCentre has played a key role in safeguarding the community and contributing to the economic prosperity of a range of industries.

Obtaining a Quote
