INTRODUCTION

Thank you for the positive feedback following the first issue of the Forensic Science Research Digest. To ensure that this and all future issues are fulfilling your needs I welcome all feedback.

I trust that Issue 2 and all forthcoming issues will continue to add value to your knowledge-base and operations.

DR JOHN COUMBAROS
MANAGER – STRATEGY, RESEARCH & DEVELOPMENT

Forensic Science

Essential science for safety and justice

Illicit Drugs

Abuse and Misuse of Pregabalin and Gabapentin, Evoy et al., Drugs, http://dx.doi.org/10.1007/s40265-017-0700-x.

Analytical characterization and pharmacological evaluation of the new psychoactive substance 4-fluoromethylphenidate (4F-MPH) and differentiation between the (±)-threo and (±)-erythro diastereomers, McLaughlin et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.2167.

Characterization and origin of the ‘B’ and ‘C’ compounds in the acid/neutral forensic signatures of heroin – products from the acylation of porphyrine and subsequent hydrolysis, Casale et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.1922.

Crystalline methamphetamine use and methamphetamine-related harms in Australia, Degenhardt et al., Drug and Alcohol Review, http://dx.doi.org/10.1111/dar.12426.

Identification and physicochemical characterization of 4-fluorobutyrfentanyl (1-((4-fluorophenyl)(1-phenethyl)piperidin-4-yl)amino)butan-1-one, 4-FBF) in seized materials and post-mortem biological samples, Rojkiewicz et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.2135.

Isolation and characterization of a newly identified impurity in methamphetamine synthesized via reductive amination of 1-phenyl-2-propanone (P2P) made from phenylacetic acid/lead (II) acetate, Toske et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.1814.

Organic impurity profiling of methylene and intermediate compounds synthesized from catechol, Heather et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.2140.

Rapid analysis of forensic-related samples using two ambient ionization techniques coupled to high-resolution mass spectrometers, Jagerdeo & Wriston, Rapid Communications in Mass Spectrometry, http://dx.doi.org/10.1002/rcm.7844.

Return of the lysergamides. Part III: Analytical characterization of N6-ethyl-6-norlysergic acid diethylamide (ETH-LAD) and 1-propionyl ETH-LAD (1P-ETH-LAD), Brandt et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.2196.

Test purchase, synthesis and characterization of 3-fluorophenmetrazine (3-FPM) and differentiation from its ortho- and para-substituted isomers, McLaughlin et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.1945.

Forensic Toxicology

2,4-Dinitrophenol, the inferno drug: a netnographic study of user experiences in the quest for leanness, McVeigh et al., Journal of Substance Use, http://dx.doi.org/10.3109/14659891.2016.1149238.

Analysis of drugs of abuse in Cerumen - correlation of postmortem analysis results with those for blood, urine and hair, Meier et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.2177.

Analytical confirmation of synthetic cannabinoids in a cohort of 179 presentations with acute recreational drug toxicity to an Emergency Department in London, UK in the first half of 2015, Abouchedid et al., Clinical Toxicology, http://dx.doi.org/10.1080/15563650.2017.1287373.

Comparison of cannabinoids in hair with self-reported cannabis consumption in heavy, light and non-cannabis users, Taylor et al., Drug and Alcohol Review, http://dx.doi.org/10.1111/dar.12412.

Development and validation of an HPLC-UV method for the simultaneous determination of the antipsychotics clozapine, olanzapine and quetiapine, several beta-blockers and their metabolites, gracía et al., Biomedical Chromatography, http://dx.doi.org/10.1002/bmc.3968.

Ethanol Concentration in 56 Refillable Electronic Cigarettes Liquid Formulations Determined by Headspace Gas Chromatography with Flame Ionization Detector (HS-GC-FID), Poklis et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.2193.

Identification and physicochemical characterization of 4-fluorobutyrfentanyl (1-((4-fluorophenyl)(1-phenethylpiperidin-4-yl)amino)butan-1-one, 4-FBF) in seized materials and post-mortem biological samples, Rojkiewicz et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.2135.

Identification and quantification of diphenidine in hair by LC-MS/MS after single administration, Alvarez et al., Toxicologie Analytique et Clinique, http://doi.org/10.1016/j.toxac.2016.09.006.

Intoxications involving acrylfentanyl and other novel designer fentanyl – results from the Swedish STRIDA project, Helander et al., Clinical Toxicology, http://dx.doi.org/10.1080/15563650.2017.1303141.

Ketamine and Beyond: Investigations into the Potential of Glutamatergic Agents to Treat Depression, Lener et al., Drugs, http://dx.doi.org/10.1007/s40265-017-0702-8.

Poisoning by synthetic cathinones: Consumption behaviour and clinical description from 11 cases recorded by the Addictovigilance Centre of Bordeaux, Daveluy et al., Toxicologie Analytique et Clinique, http://doi.org/10.1016/j.toxac.2016.11.005.

Presence of mephedrone and methylene in an attempted suicide: A surprising result where toxicological analyses have changed the initial conclusions, Aknouche et al., Toxicologie Analytique et Clinique, http://doi.org/10.1016/j.toxac.2017.01.004.

Selective solid phase extraction of JWH synthetic cannabinoids by using computationally designed peptides, Mascini et al., Talanta, http://doi.org/10.1016/j.talanta.2017.01.072.

Serum S100 protein could predict altered consciousness in glyphosate or glufosinate poisoning patients, Lee et al., Clinical Toxicology, http://dx.doi.org/10.1080/15563650.2017.1286013.

Seven years of workplace drug testing in Italy: a systematic review and meta-analysis, Rosso et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.2189.

Simultaneous analysis of 35 specific antihypertensive adulterants in dietary supplements using LC/MS/MS, Heo et al., Biomedical Chromatography, http://dx.doi.org/10.1002/bmc.3856.

The development of new psychoactive substances in France, Roussel et al., Toxicologie Analytique et Clinique, http://doi.org/10.1016/j.toxac.2016.05.053.

Urinary excretion study following consumption of various poppy seed products and investigation of the new potential street heroin marker ATM4G, Maas et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.2058.

Trace/Physical Evidence

Graphene oxide/Fe3O4 as sorbent for magnetic solid-phase extraction coupled with liquid chromatography to determine 2,4,6-trinitrotoluene in water samples, dos Reis et al., Analytical and Bioanalytical Chemistry, http://dx.doi.org/10.1007/s00216-017-0211-3.

Imidazolymethylpyrene sensor for dual optical detection of explosive chemical: 2,4,6-Trinitrophenol, Sodkhomkhum et al., Sensors and Actuators B, http://doi.org/10.1016/j.snb.2017.01.120.

Local Ion Signatures (LIS) for the examination of comprehensive two-dimensional gas chromatography applied to fire debris analysis, Lopatka et al., http://doi.org/10.1016/j.jforc.2016.10.003.

Separation of 1,3,5,7-tetranitro-1,3,5,7-tetraazacyclooctane and 1,3,5-trinitro-1,3,5-triazacyclohexane by molecularly imprinted solid-phase extraction, Wang et al., Journal of Separation Science, http://dx.doi.org/10.1002/jssc.201601024.

Forensic Biology

Exploring STR signal in the single- and multicopy number regimes: Deductions from an in silico model of the entire DNA laboratory process, Duffy et al., Electrophoresis, http://dx.doi.org/10.1002/elps.201600385.

Genetic analysis identifies the region of origin of smuggled peach palm seeds, Criso-Araujo et al., http://dx.doi.org/10.1016/j.forsciint.2017.02.009.

Quantitative analysis of single-nucleotide polymorphisms by pyrosequencing with di-base addition, Pu et al., Electrophoresis, http://dx.doi.org/10.1002/elps.201600430.

Rapid ABO genotyping by high-speed droplet allele-specific PCR using crude samples, Taira et al., Journal of Clinical Laboratory Analysis, http://dx.doi.org/10.1002/jcla.22196.

Two ovine mitochondrial DNAs harboring a fifth 75/76 bp repeat motif without altered gene expression in Northern Spain, Lopez-Oceja et al., Electrophoresis, http://dx.doi.org/10.1002/elps.201600308.

Verification of protein biomarker specificity for the identification of biological stains by quadrupole time-of-flight mass spectrometry, Legg et al., Electrophoresis, http://dx.doi.org/10.1002/elps.201600352.

Racing Chemistry

Detection of anabolic and androgenic steroids and/or their esters in horse hair using ultra-high performance liquid chromatography–high resolution mass spectrometry, Kwok et al., Journal of Chromatography A, http://doi.org/10.1016/j.chroma.2017.03.007.

Evidence of Boldenone, Nandrolone, 5(10)-Estrene-3β-17α-Diol and 4-Estrene-3,17-Dione as Minor Metabolites of Testosterone In Equine, Wong et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.2192.

Intelligence-based anti-doping from an equine biological passport, Cawley & Keledjian, Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.2180.

Interlaboratory trial for the measurement of total cobalt in equine urine and plasma by ICP-MS, Popot et al., Drug Testing and Analysis, http://dx.doi.org/10.1002/dta.2191.

Document Examination

A dominant points-based feature extraction approach to recognize online handwritten strokes, Singh et al., International Journal on Document Analysis and Recognition, http://dx.doi.org/10.1007/s10032-016-0279-x.

Writer adaptation via deeply learned features for online Chinese handwriting recognition, Du et al., International Journal on Document Analysis and Recognition, http://dx.doi.org/10.1007/s10032-017-0280-z.

Fingerprints

Footwear Evidence

Ballistics and Toolmarks

BPA

Crime Scene

Forensic Entomology

DNA extraction and barcode identification of development stages of forensically important flies in the Czech Republic, Oleksakova et al., Mitochondrial DNA Part A, http://dx.doi.org/10.1080/24701394.2017.1298102.

Using Frons Width to Differentiate Blow Fly Species (Diptera: Calliphoridae) Phormia regina (Meigen) and Protophormia terraenovae (Robineau-Desvoidy), Langer et al., Journal of Forensic Sciences, http://dx.doi.org/10.1111/1556-4029.13281.
Forensic Palynology

Wildlife Forensics

Forensic Odontology

Diet and environment 1.2 million years ago revealed through analysis of dental calculus from Europe’s oldest hominin at Sima del Elefante, Spain, Hardy et al., The Science of Nature, http://dx.doi.org/10.1007/s00114-016-1420-x.

Forensic Pathology

Multiple Giant Coronary Artery Aneurysms: A Rare Cause of Sudden Cardiac Death, Janik et al., Journal of Forensic Sciences, http://dx.doi.org/10.1111/1556-4029.13264.

Forensic Anthropology

The environmental variables that impact human decomposition in terrestrial exposed contexts within Canada, Cockle and Bell, Science & Justice, [http://doi.org/10.1016/j.scijus.2016.11.001](http://doi.org/10.1016/j.scijus.2016.11.001).

Forensic Psychiatry and Psychology

Examining gender as moderating the association between psychopathy and substance abuse, Sellbom et al., Psychology, Crime & Law, http://dx.doi.org/10.1080/1068316X.2016.1258466.

Forensic Engineering

Fire Investigation

A review on prediction models for full-scale fire behaviour of building products, Lundström et al., Fire and Materials, http://dx.doi.org/10.1002/fam.2380.

Digital Forensics

Biometrics

Statistics

CBRN

A high-throughput UHPLC–MS/MS method for the quantification of five aged butyrylcholinesterase biomarkers from human exposure to organophosphorus nerve agents, Graham et al., Biomedical Chromatography, http://dx.doi.org/10.1002/bmc.3830

Coupling Activity-Based Detection, Target Amplification, Colorimetric and Fluorometric Signal Amplification, for Quantitative Chemosensing of Fluoride Generated from Nerve Agents, Sun et al., Chemistry – A European Journal, http://dx.doi.org/10.1002/chem.201604474.

Human butyrylcholinesterase efficacy against nerve agent exposure, Reed et al, Journal of Biochemical and Molecular Toxicology, http://dx.doi.org/10.1002/jbt.21886.

Cognitive Science

Law

Eyewitness susceptibility to co-witness misinformation is influenced by co-witness confidence and own self-confidence, Thorley & Kumar, Psychology, Crime & Law, http://dx.doi.org/10.1080/1068316X.2016.1258471.

The indirectly generated tainted truth effect: warning is not necessary to worsen the testimony of non-misled persons, Szpitalak, Psychology, Crime & Law, http://dx.doi.org/10.1080/1068316X.2016.1258470.

The role of formal social control mechanisms in deterring sex offending as part of the desistance process, Cooley et al., Criminal Justice Studies, http://www.tandfonline.com/doi/full/10.1080/07418825.2017.1299335.

Witnesses’ failure to detect covert manipulations in their written statements, Sagana et al., Journal of Investigative Psychology and Offender Profiling, http://dx.doi.org/10.1002/jip.1479.

Policing

Evaluating interviews which search for the truth with suspects: but are investigators’ self-assessments of their own skills truthful ones?, Walsh et al., Psychology, Crime & Law, http://dx.doi.org/10.1080/1068316X.2017.13296149.

Narcomessages as a way to analyse the evolution of organised crime in Mexico, Atuesta, Global Crime, http://dx.doi.org/10.1080/17440572.2016.1248556.

Predicting perceived police effectiveness in public housing: police contact, police trust, and police responsiveness, Torres, Policing and Society, http://dx.doi.org/10.1080/10439463.2015.1077837.

Role of street network in burglars’ spatial decision-making, Frith et al., Criminology, http://dx.doi.org/10.1111/1745-9125.12133.

Terrorist attacks targeting the police: the connection to foreign military presence, Gibbs, Police Practice and Research, http://dx.doi.org/10.1080/15614263.2017.1295245.

Other/General

Civics, Policy, and Demoralization, Jacobs, Criminal justice Ethics, http://dx.doi.org/10.1080/0731129X.2017.1298880.

Doping and drug testing, Boye et al., EMBO reports, http://dx.doi.org/10.1525/embr.201643540.
