

# Vacation Work Program

## Kick-start Your Chemistry Career With Hands-on experience at ChemCentre!

Dreaming of a chemistry career that makes a difference? Want to test the waters in exciting areas like forensic science, environmental analysis, or workplace safety? ChemCentre offers paid vacation work for driven final-year chemistry students just like you!

This isn't your average summer job. You'll be actively involved in laboratory work, honing your practical skills while working on real-world projects. Think instrument maintenance, contributing to method innovation, and mastering the end-to-end analytical process – from sample registration to delivering results.

This program is open to tertiary students who are in the final year of a chemistry degree, third year or honours, and are Australian citizens or have an appropriate working visa. Your paid summer adventure in world-class labs starts here. Don't just study chemistry, live it.

### Benefits

- Practical laboratory professional development
